

Medical Billing & Coding Course **Allied Health Program**

The Medical Billing and Coding course offers the skills needed to solve insurance billing problems, how to manually file claims (using the CPT and ICD-10 manual), complete common insurance forms, trace delinquent claims, appeal denied claims, A&P and insurance billing process, medical office insurance processing and use generic forms to streamline billing procedures. This course covers the following areas: Medical Terminology, CPT (Introduction, Guidelines, Evaluation and Management), specialty fields (such as surgery, radiology, and laboratory), ICD-10 (Introduction and Guidelines) and basic claims processes for medical insurance and third-party reimbursements. Students will learn how to find the service and codes using manuals, (CPT, ICD-10 and HCPCS). After obtaining the practical work experience (6months to 2 years), students who complete this course could be qualified to sit for the American Academy of Professional Coders (AAPC), Certified Professional Coder Exam (CPC) or Certified Outpatient Coder Exam (COG); the American Health Information Association (AHIMA) Certified Coding Associate (CCA) exam; and/or other National Certification Exams.

Questions regarding this course, testing, clinical externship, etc.: Please contact our Allied Health Coordinator, Holli Easley at 903-823-3270 or email at: holli.easley@texarkanacollege.edu.

The Medical Billing and Coding Professional

Medical Billing and Coding Professional

Medical billing and coding professionals keep records, calculate patient charges and review files. Duties include reviewing records, calculating charges for a patient's procedure and service, and preparing itemized statements and submitting claims to third party payers. Medical Coders are responsible for the collection of physician charges and patient data to ensure that claims are submitted to insurance carriers accurately and in the most efficient and expeditious manner.

Medical Billing and Coding is one of the fastest growing careers in the health care industry today!

The need for professionals that understand how to code health care services and procedures for third party insurance reimbursement is growing substantially. Physician practices, hospitals, pharmacies, long-term care facilities, chiropractic practices, physical therapy practices and other health care providers all depend on medical billing and coding for insurance carrier reimbursement.

Medical Terminology

Medical Terminology & Anatomy for Coding, Edition 3 is specifically tailored to ICD-10-CM and ICD-10-PCS coding manuals and supplies you with an excellent foundation for learning medical terminology related to coding. This resource is unlike any other medical terminology textbook.

By interspersing ICD-10 and CPT coding guidelines and notes, electronic medical records, and integrated exercises, it combines anatomy & physiology coverage with the latest medical terminology coders and coding students need.

- Introduction to medical terminology
- Body structure and directional terminology.
- Musculoskeletal system and connective tissue.
- Digestive system.
- · Genitourinary system.
- Circulatory system.
- Respiratory system.
- Nervous system.
- Endocrine system and nutritional and metabolic diseases.
